

AMANDEEP YADAV

Backend Software Developer | Java, Spring Boot, Kafka, Kubernetes | Telecom Platforms

Pune, MH, India | amandeepro79@gmail.com
amandeepyadav.com | linkedin.com/in/amandeep-yadav | github.com/appy79

Technical Skills

Backend	Java, Spring Boot, REST APIs, Microservices, Python, Flask
Data	Kafka, Redis, Cassandra DB, Couchbase, PostgreSQL, SQL, NoSQL
Cloud/DevOps	Kubernetes, Docker, GitLab CI/CD, Jenkins, Vault, AWS, Azure, Fabric8
Frontend	React.js, Angular.js, JavaScript, TypeScript, Three.js
Testing	JUnit, Mockito, TestNG, Postman
Domain	Telecom charging, digital billing, service ordering, platform tooling

Professional Experience

Experienced Software Developer | Amdocs | Pune, MH, India | 07/2025 - Current

- Production Deployment Tool: Built an internal dashboard with Java Spring Boot, Fabric8, GitLab REST API, React.js, and Vault. Added environment comparison, change validation, and caching for ~500 concurrent API calls, reducing developer and tester delivery effort by 20%.
- AT&T Openet: Developed Openet CHF-CGF microservices with Java Spring Boot, Redis, Cassandra DB, Kubernetes, and Kafka. Enabled real-time charging for 50M+ subscribers' usage, scaling to 1M+ events/sec with 99.9% accuracy.
- Metro By T-Mobile: Built Spring Boot, Kafka, Angular.js, Jenkins, and Kubernetes services for post-acquisition access to 20M+ Metro brand users, improving adoption by 15% and reducing integration time by 40%.

Software Developer | Amdocs | Pune, MH, India | 07/2023 - 06/2025

- TMO DGB: Built Digital Billing aggregation microservices with Java Spring Boot, Kafka, Redis, Vault, GitLab CI/CD, and Kubernetes. Aggregated 5M+ daily records for 40M+ subscribers with 99.9% reliability and 50% faster sync.
- NorthStar: Modernized ordering from legacy SOA to Spring Boot, Kafka, Camunda, Couchbase, PostgreSQL, Jenkins, and Kubernetes microservices. Delivered 99.99% uptime, 100+ features/fixes, 30% faster deployments, and 4x throughput.

Backend Intern | DUBDUB.AI | Pune, MH, India | 10/2021 - 01/2022

- Multiprocessing: Optimized a Flask/FFmpeg media service with Python multiprocessing across workers, increasing throughput by approx. 300% for 10K+ daily media tasks.
- Training Pipeline: Built a Python Flask data pipeline with Google API client, AWS S3/EC2, and Docker for ML training. Automated 1000+ daily records, cutting prep time 70% and accelerating training cycles by 50%.
- Gamify: Designed a usage-based monetization microservice with Python Flask on AWS Docker, enabling early billing workflows, \$200K initial revenue, and 35% faster go-to-market.

Education

Master of Computer Applications	NIT Trichy Tiruchirappalli, India 07/2020 - 06/2023
Bachelor of Computer Applications	University of Rajasthan Jaipur, India 07/2017 - 06/2020
Schooling	Rashtriya Military School Ajmer, India 04/2010 - 03/2017
